a. (S/NF)

SG1
Ab. (S/NF) RESPONSE:

- o Experienced individual perceives that fuel-air explosives will not be used in the near future. (i.e., next 3-4 weeks).
- o Less experienced individual perceives possible use of fuel-air explosives in the 8 November 1990 time frame, and perceives storage location for such explosives in Iraq to be in vicinity of:
 - 31°55'N/44°50'E
 - 33°15'N/43°10'E
 - 30°10'N/46°46'E

c. (U) DATE OF LAST RESPONSE: 29 Oct 90d. (U) COMMENTS: This task can be updated if desired.

8. (S/NF) OTHER DATA: On 22 Oct 1990, an experienced individual provided the following information that may be of interest, although not directly related to tasking.

- a. Egypt will play a significant role in future peace negotiations.
- b. The UN will continue to increase its role in negotiations.
- c. A name "Camary/Kamaru" is important (presumably in regard to peace negotiations).
- d. More Hostages will be released during November, 1990.

If affirmative, additional efforts should be pursued to determine the current location of the "fuel-air" explosives and to determine their target objectives.

2. (S/NF/SK) Remote Viewer 025 indicated there would be no immediate use made of fuel-air explosives. Viewer 025 was unable to determine the current location of the fuel-air explosives. The results of 025's effort are at TAB A.

3. (S/NF/SK) Remote Viewer 052 projected the possible use of fuel-air explosives against US and coalition forces in Saudi Arabia for 8 November 1990. Viewer 052 indicated three locations in Iraq, where such explosives are currently located. The sites were located at geographical coordinates 31°55'N/44°50'E, 33°15'N/43°10'E; and 30°10'N/46°50'E. See strip map at TAB B. The two principal target objectives in Saudi Arabia were

identified as being located at geographical coordinates 26°20'N/43°020'E and at 24°50'N/47°05'E. See copy of strip map at TAB C. A representational sketch of the fuel-air explosive is at TAB D. Because 052 perceived the occurrence of a meeting apparently related to the fuel-air explosives, a second session was conducted on 29 October in an effort to obtain data related to specific plans and intentions. 052 was unable to identify and describe pertinent indicators. The results of 052's two sessions are at TAB E.

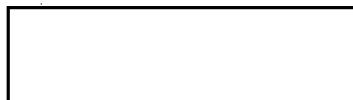

4. (S/NF/SK) OPS COMMENTS: Remote Viewer 052 appears to be on target; however, 052's projection of the occurrence in future time, specifically 8 November 1990, is highly doubtful. Data related to the current location of the fuel-air explosives has more plausibility by virtue of the fact that it does not address an issue in future time.

SUMMARY OF INFORMATION:

There are nine people sitting around a table, four men on each side and one dark haired man sitting on the end. men. They are talking to each other, sometimes shouting. The man sitting on the end of the table is listening. He does not say very much, but when he does he speaks very loud. He is almost overpowering. He is in complete control. They are having a meeting and are planning something. I could not access the person to find out what it was. The table in front of them is very hard, made of marble or very hard wood. There are a few pieces of paper on the table but nothing else. The walls in this room are bare. There are a few old paintings hanging up, but nothing else on the walls. The ceiling is very high. The room is large, but it is empty, except for this table.

I could also see a strange object. It is round, with jagged points on the end of it. It is very bright. This object kept appearing out of nowhere, confusing me as to whether I was in this room or out of it.

Not much in this room

Just a big table

Don't feel good about this

Keep fading in and out

Feels so real to be there

I want to go describe something else

Biggest thing is gone now.

I want to go back to the people & find
out what they are talking about.

Wide open room

It's warm

Table in front of me

People are talking; shouting so loud

I can't even hear them.

They're going to do what they're doing;

[What are they going to do?]

They don't know - that's why they're yelling.

WORKING PAPER

Project: 90104-G
Date: 26 OCT 90
Time: 1421-1540
Viewer: 052
Session: 01

SUMMARY OF INFORMATION:

Iraq will use fuel-air explosives against US and coalition forces in Saudi Arabia. The first use will be on or about 8 NOV 90. They are currently located in three areas within Iraq: 31 55N/44 50E ; 33 15N/43 10E ; and 30 10N/46 50E. Their target objectives seem to be vicinity 26 20N/43 20E mostly, and 24 50N/47 05E in Saudi Arabia.

When first given the coordinates, I could see a group of people sitting around a table. One guy with black hair and a dark colored suit seemed to be at the head of the table and in charge. The rest of the people were sitting around the table and talking. Some were angry, arguing, and almost shouting. But the guy in charge was only listening to them. All of the people were older men, some of them bald, some had white hair, and others had something on their head. They had deep, raspy voices. They were having a meeting or conference of some sort. The back of the chairs they were sitting in were really high, almost to shoulder level as they sat. The ceiling in the room was

also very high and the walls were plain. There were only a few pictures or old paintings on some of the walls. Most of them were empty. The entire building was a huge structure. It was rectangular/square shape with a large dome on the top with a sharp tip. It is an old building with many small details and arches.

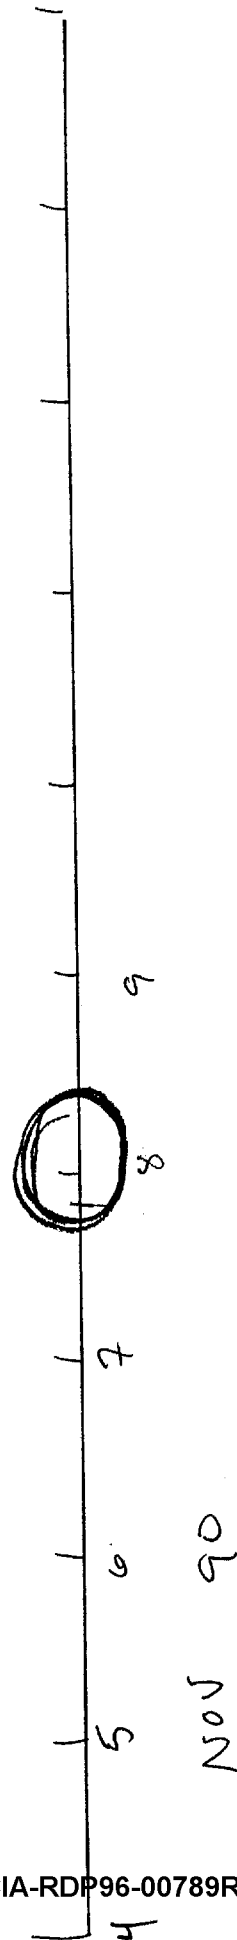

The object of interest is rounded and dark. I could see a strange airplane flying overhead. It was dark in color, dark blue or black, long, narrow, and the wings seemed to be flat. There is a round object below it and two flashes of light, "flash", "flash", they are very quick and very bright. There is also a long rectangular, boxy, narrow shaped object that has a metal thing coming out of one end. The end of the metal thing was curved, (see sketch). Also, somewhere on this object were jagged, arrow-like markings or protrusions. This object seems to be far away, I can't get very close to it, but something about this object is "high frequency", possibly the sound of it. The purpose of this object is to be used as a weapon.
